Python with Data Science

A comprehensive, career-focused program designed to take you from Python fundamentals to real-world data science applications — powered by **TechKraftiers**.

INDUSTRY-READY CURRICULUM

LIVE PROJECTS INCLUDED

PLACEMENT SUPPORT

About TechKraftiers

TechKraftiers is a premier technology training institute dedicated to bridging the gap between academic learning and industry demands. We deliver cutting-edge, hands-on programs in Python, Data Science, AI, and more.

🎯 Our Mission

Empower learners with job-ready technical skills through practical, project-based education.

🏆 Our Track Record

Thousands of successful alumni placed in top tech companies across the globe.

🤝 Industry Network

Active partnerships with leading IT firms for internship and placement opportunities.

Why Learn Python & Data Science?

Data Science is the **fastest-growing career field** of the decade. Python is the world's #1 language for AI, automation, and analytics — and demand far outpaces supply.

#1

Programming Language

Python ranks #1 globally on the TIOBE Index for 3 consecutive years

$120K

Avg. Annual Salary

Data Scientists earn among the highest salaries in tech

11M+

Jobs by 2026

Projected data science and analytics roles worldwide

50%

Faster Hiring

Python-certified candidates are hired significantly faster

Comprehensive Course Modules

Our curriculum is structured in progressive tiers — from foundational Python to advanced machine learning — ensuring every learner builds genuine expertise.

1

Python Basics

Syntax, data types, loops, functions, OOP fundamentals

2

Advanced Python

Decorators, generators, file I/O, exception handling, modules

3

NumPy & Pandas

Array computing, DataFrames, data wrangling, aggregation

4

SQL Basics

Queries, joins, subqueries, database integration with Python

5

Data Visualization

Matplotlib, Seaborn, Plotly — charts, heatmaps, dashboards

1

Machine Learning

Supervised & unsupervised learning, Scikit-learn, model evaluation

2

Deep Learning Intro

Neural networks, TensorFlow basics, CNN fundamentals

3

Power BI Basics

Interactive dashboards, DAX queries, data connectors

4

Statistics for DS

Probability, distributions, hypothesis testing, regression

5

Capstone Projects

End-to-end data analysis projects with real-world datasets

Tools & Technologies Covered

Python 3.x

Core language for scripting, automation, and data workflows

Jupyter Notebook

Interactive coding environment for data exploration and visualization

NumPy & Pandas

Industry-standard libraries for numerical and tabular data processing

Power BI

Business intelligence tool for interactive data dashboards and reporting

Scikit-learn

Production-ready ML algorithms including classification, regression, clustering

Live Projects & Hands-On Experience

Every student completes **real-world capstone projects** that go directly into their professional portfolio.

📊 Sales Forecasting Dashboard

Predict revenue trends using regression models and visualize with Power BI

🤖 Customer Churn Prediction

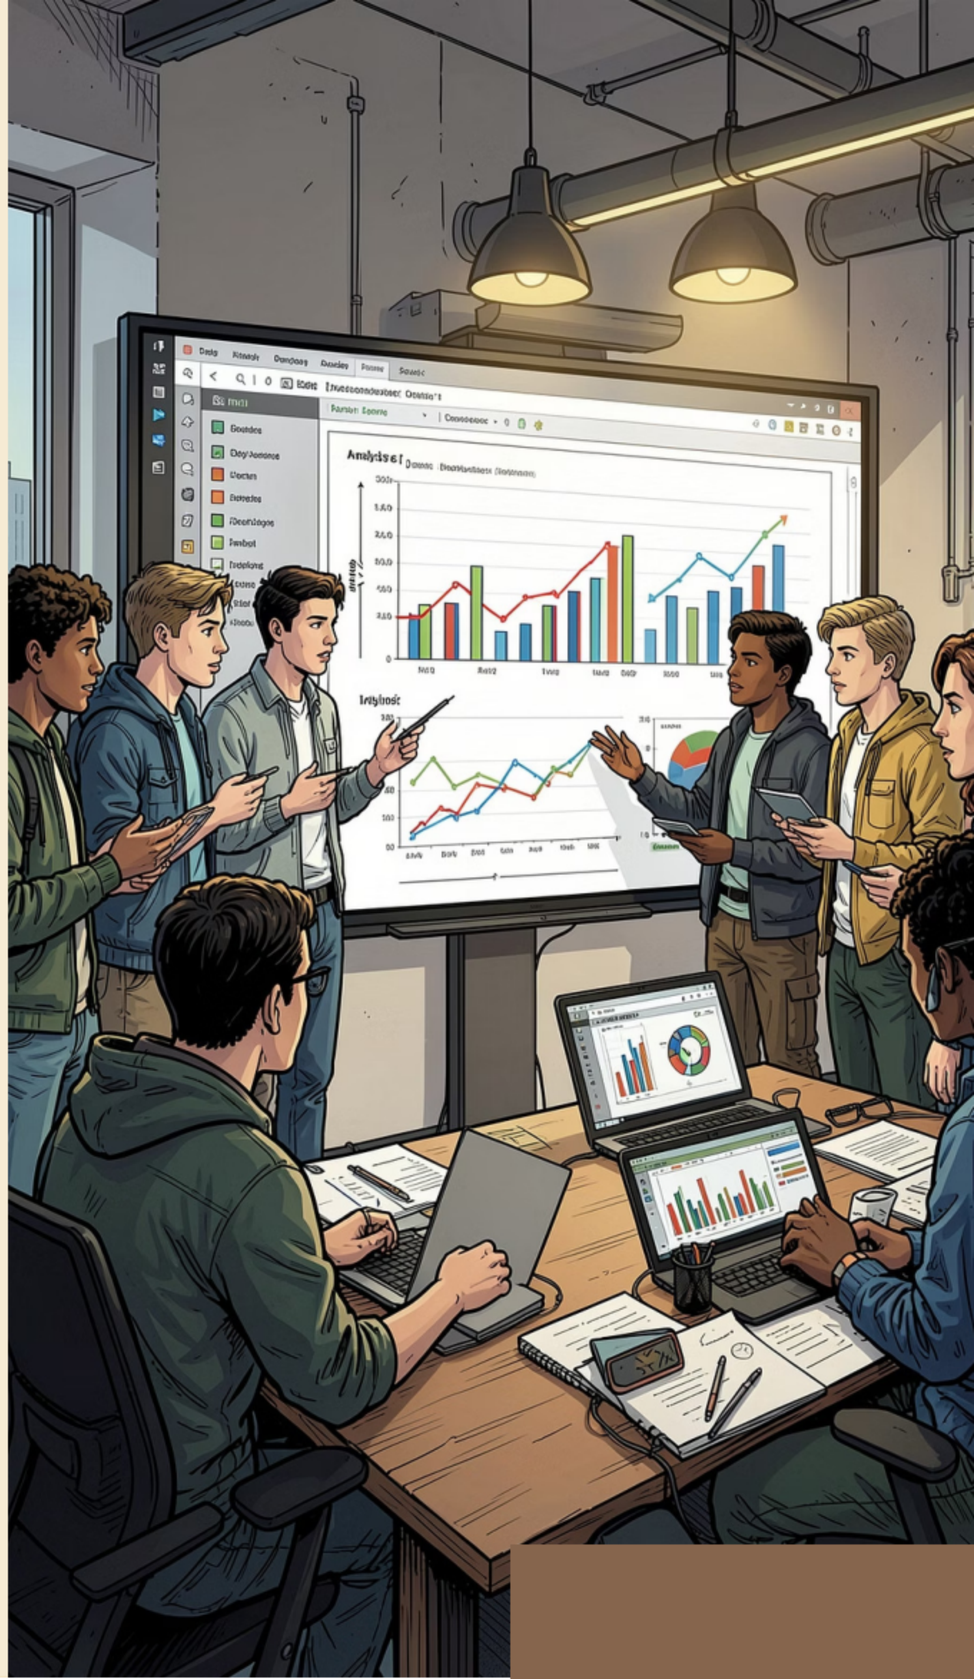

Build a classification model using Scikit-learn on real telecom datasets

🧹 EDA & Data Cleaning Project

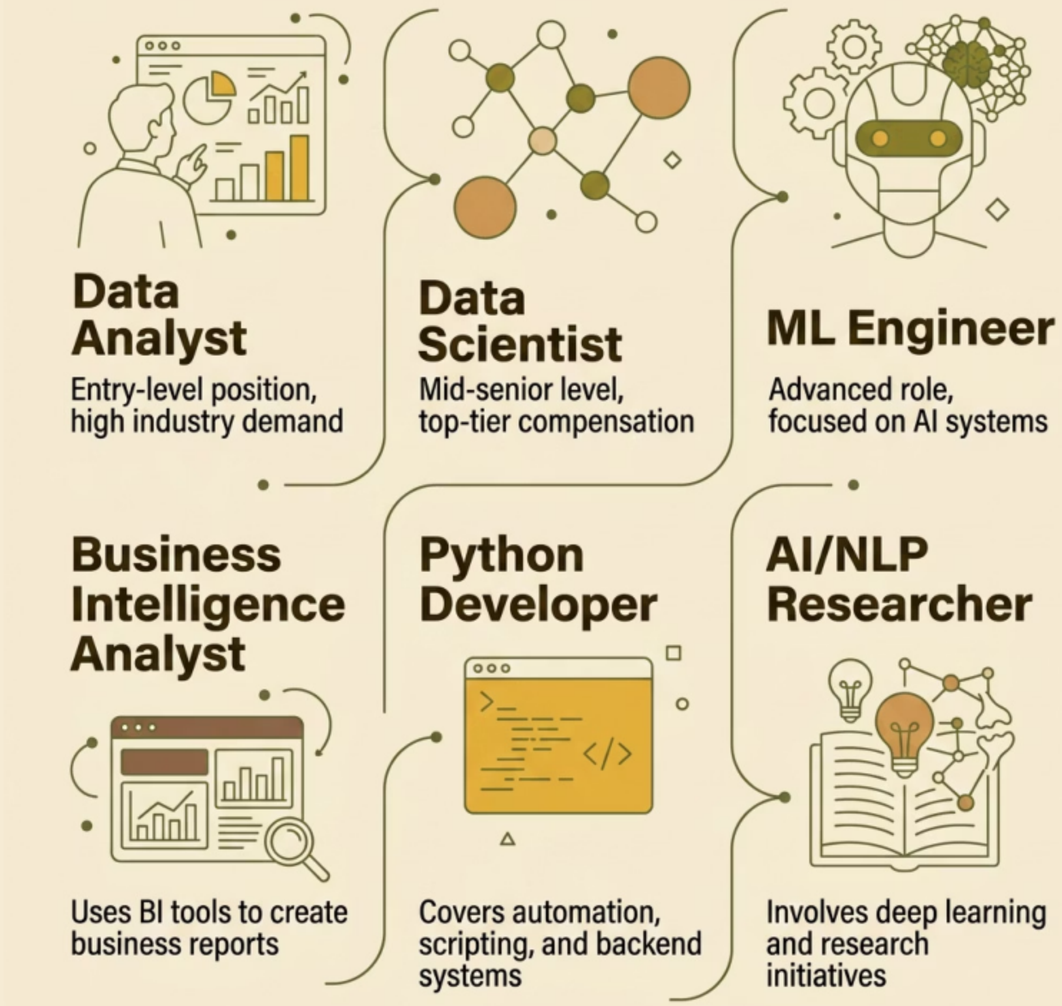

Clean, transform, and analyze messy datasets using Pandas and NumPy

📈 Stock Market Analysis

Scrape, process, and visualize financial data with Matplotlib and Seaborn

Career Opportunities After This Program

Where Our Alumni Work

TechKraftiers graduates are employed at top-tier companies in technology, finance, healthcare, and e-commerce sectors.

- **Data Analyst** — Most common entry-level role, avg. $75K–$95K
- **Data Scientist** — High-demand, avg. $110K–$140K
- **ML Engineer** — Fastest growing role in tech
- **BI Analyst** — Power BI & SQL specialists
- **Python Developer** — Automation & backend scripting

90%+ placement rate within 6 months of graduation

Certification & Recognition

Upon successful completion of the program and all project milestones, students receive an **industry-recognized TechKraftiers certificate** — valued by hiring managers and corporate partners nationwide.

✅ Course Completion

Awarded after completing all modules and assessments with a passing score

🏅 Project Excellence

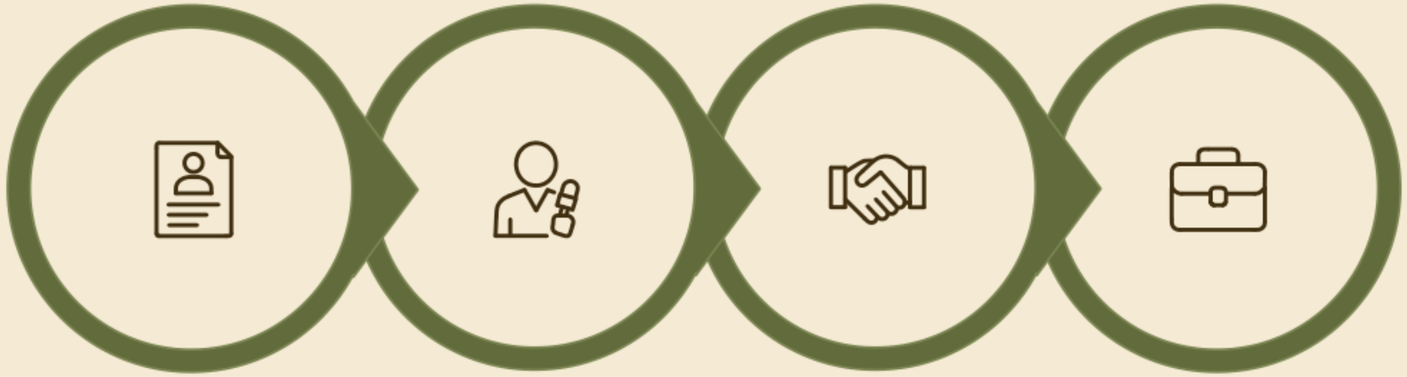

Special recognition badge for outstanding capstone project performance

🔗 LinkedIn Ready

Digital certificates shareable directly to your LinkedIn profile and resume

Internship & Placement Support

Resume & LinkedIn | **Mock Interviews** | **Industry Referrals** | **Job Placement**

Our dedicated placement team works with each student individually — from building a standout resume to preparing for technical interviews at top companies.

What's Included

- 1-on-1 career counseling sessions
- Resume & portfolio review
- Live mock interview panels
- Access to TechKraftiers' hiring network
- Internship referrals with partner firms
- Soft skills & communication workshops

Why Choose TechKraftiers?

We don't just teach — we transform careers. Here's what makes the TechKraftiers experience exceptional.

Expert-Led Training

Learn from industry practitioners with 10+ years of real-world data science experience

Hands-On Projects

Build a portfolio of 5+ live projects that demonstrate your skills to employers

Flexible Batches

Weekday, weekend, and online-hybrid schedules to fit your lifestyle

Lifetime Alumni Access

Stay connected with our community, resources, and job board — forever

📞 **Enroll Now** — Limited seats per batch. Contact us at **info@techkraftiers.com** or visit **www.techkraftiers.com** to register today.
